

Dear...

**Parliamentary Briefing: Care for Women, Thurs 10 Dec., 2pm**

I am writing to ask you to attend a Parliamentary Briefing on 10 December about the consequences of the Government's decision in March 2020 to permit DIY home abortions.

The briefing is 2pm – 3pm on Thursday 10 December and will take place via Zoom. Full details and registration are found at this link: <https://care-for-women.eventbrite.co.uk>

As you know, the home abortion scheme was introduced as a temporary emergency measure under the lockdown regulations. Now the government has launched a consultation seeking views on whether 'pills by post' abortion provision should be made permanent.

The Parliamentary Briefing will discuss the legality of the 'pills by post' scheme and the findings of a mystery client investigation, which exposed the lack of safeguards for women requesting abortion pills. You will also hear the testimony of a woman who carried out her own abortion at home and experienced devastating side-effects.

I do hope that you will be able to attend this important briefing. Dangerous DIY abortion measures should not be made permanent.

Please do let me know if you will be attending this briefing.

Yours sincerely,
